September 30, 2024	1.0	Initial release of the combined NAS NANP Administration System (NAS) Registration User Guide.

1 Introduction

1.1 Purpose

This document outlines the process for registering for the NANP Administration System (NAS); including user type descriptions to assist with the selection of the appropriate user type and step-by-step registration instructions for each user type.

1.2 NANP Administration System (NAS) Overview

The NANP Administration System (NAS) supports the administration of several North American Numbering Plan (NANP) resources, including Numbering Plan Areas (NPA), Central Office (CO) Codes, Thousands-Blocks, 5XX-NXX, 9YY-NXX, Carrier Identification Codes (CICs), and pseudo-Automatic Numbering Identification (p-ANIs). In addition, NAS supports the North American Number Plan Numbering Resource Utilization and Forecast (NRUF), Thousands-Block Forecast, p-ANI Forecast reporting, Annual Reporting for p-ANI and Carrier Identification Codes (CIC), and the NANP Notification System (NNS).

The data available to a NAS user shall be restricted based on the user type selected and the subscription choices selected. To identify the appropriate user type, proceed to Section **1.3 User Type Description**.

1.3 User Type Description

1.3.1 Other User

An Other user is a representative of a Service Provider (SP) that operates in a NANP member country or is a representative of an Administrator for a NANP member country (i.e., Canada).

When an Other user wants to add an Operating Company Number (OCN) to NAS, the OCN must be associated with National Exchange Carrier Association (NECA) Company Code Category Type that has been determined to be appropriate for the direct assignment of Numbering Resources. The OCN must be in the NAS OCN Table in order to add it to a registration, see Section **1.6.1 Operating Company Number (OCN)**.

Other users will be able to submit and view reports, applications, and forms for the resources associated with the **Resource Subscription** option(s) selected.

Other users will be able to submit and view data for OCNs and Interexchange Access Customer [IACs aka Access Customer Name Abbreviation (ACNA)] in their user profile.

To register as an Other user, proceed to Section **2 Other User Registration**.

1.4 Content Summary

This document will guide Service Provider (SP) and Service Provider Consultant (SPC) users through the following tasks related to NAS registration:
- Role
- User Information
- Address
- Authorizer
- Company Identifier & Service Area
- NNS Notifications
- Review & Submit

1.5 Conventions

This document presents the text that appears on NAS screens (e.g., toolbar items, field labels and buttons) as well as internal and external document references. Toolbar items, field names, buttons and internal document references are shown in **bold black**, internal document references are hyperlinked, and external document references are *black italicized*.

1.6 Preparations

1.6.1 Operating Company Number (OCN)

The Operating Company Number (OCN) must be in the NAS to add it to a user profile and must be associated with a National Exchange Carrier Association (NECA) Company Code Category Type that has been determined to be appropriate for the direct assignment of Numbering Resources.

An OCN missing from the NAS OCN Table will result in an error message.

To add an OCN to the NAS OCN Table, email support@nanpa.com. The email shall include:
- a request to add the OCN to NAS,
- the Company OCN letter from NECA for the specific OCN being added,
- supporting documentation showing the relationship/affiliation between companies if the OCN name on the NECA letter and/or Certification is different from the company name listed on the registration.

1.7 Troubleshooting

Any questions or issues may be emailed to support@nanpa.com or call 866-623-2282.
