General Description

On November 19, 2002, the New Mexico Public Regulation Commission issued a final order in Utility Case No. 3330 regarding the petition for approval of a relief plan for the New Mexico 505 NPA. Due to the corresponding extension of the exhaust forecast for the 505 NPA to the second quarter of 2006 and the implementation of number pooling, the case is dismissed. Additionally, the order terminates Commission consideration of rate center consolidation in these proceedings. The order is effective immediately and the docket is closed.

NPA code 575 will be returned to “reserved” status.

This update replaces PL-312.
